brutal criminal act yet but also some of main inciters of this case are moving freely and continuing their rascality. The reason behind not taking this case seriously is that all warlord of three decade war and offenders of human rights specially women right accusers are part of this national brutality government and with all their power and resources they support partners of their crime.

We can't expect justice and woman rights in the presence and power of fundamentalist criminals and warlords.

Women of our country can only broke chain of present terror and brutality by politically educating and organizing them self with progressive struggle for justice. Its job of every noble and conscionable person to stand for pleading with continuous and tireless struggle for the blood of Farkhunda and thousands of Farkhunda alike women who are burning in the fire of fundamentalism, brutality and men dominated society and to fight for justice and humanity in our country.
